TABLE OF CONTENTS

American Security Products Company has been dedicated to manufacturing high quality, high security safes since 1946. We offer an extensive product line of over 400 standard models of burglary and fire resistant safes in every insurance classification from "B" rate to Underwriter's Laboratories TL-15, TL-30 and TL-30x6.

AMSEC is the largest and most respected safe manufacturer in the industry because:

- Our dedicated Customer Service Representatives care about you.
- Fully staffed Technical Service Department networked with thousands of factory trained technicians.
- Our Quality Control Department assures that the products we build are the finest in the industry.
- State-of-the-art computer controlled manufacturing equipment helps us meet demanding deadlines and keeps us on the leading edge of technology.
- We are located in a major West Coast distribution point with direct access to all major domestic and international freight services.
- We specialize in developing custom safes to meet specific cash handling requirements for banks, restaurants, supermarkets, convenience stores and many other industries.
- Our Engineering and Design Department is fully staffed and features the most advanced CAD system for rapid creation of sales drawings, design modifications and precise manufacturing blue prints.

For superior asset protection there is only one name you can trust for quality, service and reliability. . .***AMSEC***.

AMSEC reserves the right to incorporate any improvements and alter any specifications without prior notice. AMSEC reserves the right to update products as necessary, AMSEC is not responsible for typographical errors.

DEFENSE VAULT

AMSEC's **DV652** was produced from our culture of listening to customers. Customers wanted a secure place to store their home defense weapons. Sleek enough to fit under most beds, the DV652 can be secured to either the floor or the bed and is equipped with our backlit U.L. Listed ESL5 lock, which offers a silent stealth-mode option and was specifically designed for this product.

FEATURES

- Foam Padded Slide-Out Gun Tray
- Electronic Lock with Backlit Keypad
- 14-Gauge Steel Construction
- 5-Point Locking Bar
- 4 Mounting Holes on Both the Top and Bottom

Model	Outside Dimension H x W x D	Wt. Lbs.
DV652	6" x 52" x 14"	90
Tray Size	3 ⅜" x 43¼" x 13"	

VAULT DOOR

Turn Your Entire Room Into a Security VAULT

AMSEC Vault Doors offer the same protection as our innovative BF Gun Safes. They are designed to fit standard 80" x 30" and 80" x 36" door openings. With our inward-swinging vault door option, your vault room can also serve as a storm shelter. The vault door's inward swing ensures that you will be able to open the door even if debris has fallen on the other side. All AMSEC vault doors can be opened from the inside, ensuring personal safety.

STANDARD FEATURES

- 2" Thick Door
- 10 1½" Chrome Plated Bolts (5 bolts on inswing doors)
- Adjustable Frame to Fit Walls Ranging From 4¾" to 9½" Thick
- Safety Lock Release
- Spy-Proof Key-Locking Dial
- 1 Year Parts and Labor Warranty

BF SERIES VAULT DOOR FEATURES

- ½" Steel Plate on Face of Door
- 1⅜" of Seamless Drylight as Fire Protection

BFQ SERIES VAULT DOOR FEATURES

- 1/4" Steel Plate on Face of Door
- 1⅝" of Seamless Drylight as Fire Protection

OPTIONAL FEATURES

- Left-Swing Door Available

GUN SAFE FIRE AND BURGLARY PROTECTION

American Security Products Co. is highly acclaimed for offering the industry's best fire protection. We manufacture the industry's broadest gamut of fire-rated products ranging from Underwriters Laboratories (U.L.) Listed 1 and 2 hour fire safes to our Intertek laboratory tested 2 hr., 90 minute, 60 minute and 30 minute fire protected gun safes.

Each safe is designed to maintain an interior temperature less than 350°F.

Paper products will char at approximately 450°F.

NF SERIES - 90 MINUTE FIRE

The American Security Products NF Gun Safe offers both superior performance and value. For burglary protection, it has a stout ¼"-thick steel plate in the door. For fire protection, it is lined with 3 layers of drywall that are strategically engineered for optimal fire protection. This enables the NF Gun Safe to pass a verified 90-minute fire test at Intertek, an independent testing laboratory.

GUN SAFE ACCESSORIES AND OPTIONS

GUN SAFE ACCESSORIES

8" COMPACT LED LIGHT KIT

Provides greater visibility inside smaller AMSEC safes. Features two 8" light strips with high-intensity white LED lights and a motion sensor that automatically turns the lights on when motion is detected. The lights turn off 30 seconds after motion has stopped. This light kit can be installed on any AMSEC safe. Includes battery pack. Retrofit Only.

36" LED LIGHT KIT

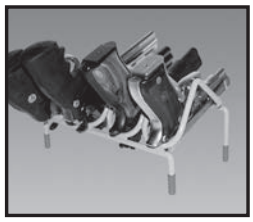
Has two 36" light strips with high-intensity white LED lights and a motion sensor that automatically turns the lights on when motion is detected. The lights turn off 30 seconds after motion has stopped. This light kit can be installed on any AMSEC safe and is also available as a retrofit kit.

"AR" RACK

"AR" gun racks are fully adjustable and custom fit in the side shelf area of each "BF" series gun safe. Each rack is designed with enough clearance to accommodate extra large front sights or optics.

DEHUMIDIFIER ROD

Will constantly guard your guns against the threat of rust, pitting and moisture damage. Electrical access is required.



PISTOL RACK

Ideal for organizing pistols inside your safe. This four gun pistol rack sits on top of an interior shelf.

POWER STRIP

3 Outlet Power Strip with two USB ports.

SMALL DRAWER:

7" x 1½" x 3⅝"

LARGE DRAWER:

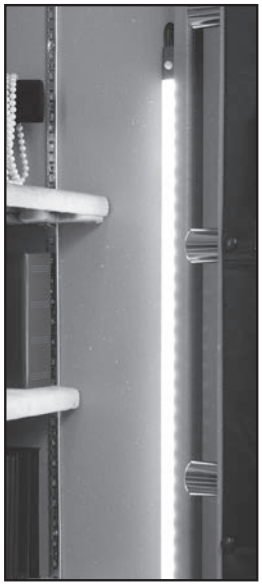
10" x 13 13/16" x 3⅝"

JEWELRY DRAWER

Velvet lined jewelry drawer that can be installed on top or underneath most shelves.

.50 CALIBER HANDLE

5-Spoke handle.
Available in Black Nickel only.



PREMIUM UPGRADE PACKAGE FOR RF, BFX, BFII, NF AND SF SAFES

When you choose to upgrade your American Security RF, BFX, BFII, NF or SF Series with a Premium Package, we'll add on some of our most popular options, including the Dehumidifier Rod, a Jewelry Drawer, an LED light kit*, and a 3-outlet power strip with USB. (*LED light kit standard on BFX or BFII gun safes).

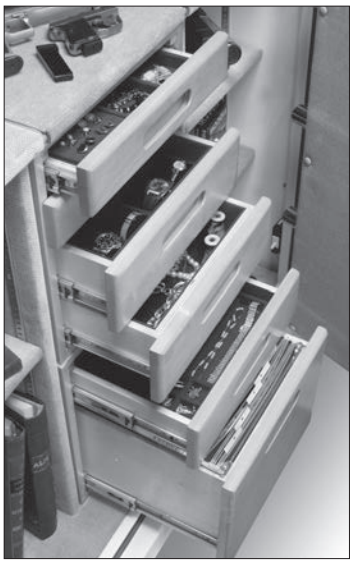
DESSICANT

Prevents rust and moisture damage. Recommended for safes without electrical access.

STOR-IT CABINETS

Storit Cabinets

These elegant, well-appointed **2-DRAWER AND 4-DRAWER INTERIOR CHESTS** are finely crafted in solid-wood maple drawer fronts and maple veneer and finished in a rich honey maple stain. Recessed drawer pulls give these cabinets a more streamlined appearance and makes for an easier fit into a variety of AMSEC safes. All drawers are elegantly lined in a silky, dark red felt with heavy-duty, ball-bearing drawer glides and include a variety of organizer inserts. Each insert can be removed for easy viewing, selecting and protection of your jewelry.



2-DRAWER OPTION:

- Top drawer includes a Three Compartment Ring Organizer and a Seven Compartment Jewelry Organizer. Bottom drawer can be used for bulky items or converts to a file drawer.
- Outside Dimensions: 16-1/2" x 15-7/8" x 14"
- Weight: 28 lbs.

4-DRAWER OPTION:

- Top drawer features a three compartment ring organizer and a seven compartment jewelry organizer. Drawer two features a three compartment necklace organizer. Drawer three features a four compartment watch organizer. Drawer four can be used for bulky items.
- Outside Dimensions: 16-1/2" x 15-7/8" x 14"
- Weight: 29 lbs.

THE SAFE CLOAK

HIDE YOUR GUN SAFE IN PLAIN SIGHT!

Instantly disguise your gun safe with Amsec's Safe Cloak. Available in five different sizes, the Safe Cloak fits over your gun safe to instantly disguise it as a wood cabinet. Strong magnets and a sewn-in PVC board at the top easily and securely hold the cloak in place. The thermal-transfer, four-color wood-cabinet print is so good, it will fool not only passersby, but guests as well.

Available in the following sizes:
6024, 6030, 6636, 7240, 7250.

U.L. LISTED FIRE RATED BURGLARY SAFES

The AMSEC **BF® SERIES** offers a unique design that combines all the security features of a burglary safe and the peace of mind achieved with a fire safe. The industry's first U.L. Listed, fire-rated burglary safe offers an affordable solution when burglary and fire protection are an essential part of your buying decision!

During Underwriter's Laboratories grueling testing procedures, the **BF® SERIES** earned the U.L. Listed Class 350°F One Hour Fire Label and the (RSC) Residential Security Container Burglary Label.

BF® Safes Lifetime Replacement Warranty:
If your BF® safe is forceably entered, undergoes a drill, punch, or pry attack or is damaged by fire, your BF® safe will be replaced free of charge. Just return the safe freight prepaid to the factory accompanied with the fire report. Contact your dealer for further details.

Palusol® BASF

INTUMESCENT DOOR SEAL:

When the intumescent seal is exposed to high temperature (above 250°F), it expands to as much as 8 times it's original thickness. In this expanded or reactive state, it has very high thermal insulating capacity and resistance to breakdown. This provides a strong positive seal between the door and body, preventing heat influx.

FEATURES

- The best warranty in the business. Lifetime fire replacement and one year parts and labor.
- U.L. 1-Hr. 350°F fire rating. Tested at temperatures up to 1700°F
- ETL certified 60-minute fire protection on BF3416.

DOOR:

- 3½" thick, consisting of ½" plate steel with a unique proprietary fire and burglary resistant material.
- Dual seal design utilizes a silicone foam seal with a heat-expanding Palusol intumescent seal.
- U.L. listed Group II lock with spring-loaded auxiliary relock device.
- ¼" heavy duty carburized hardplate.

BODY:

- $2^{5}/_{8}$" thick, consisting of $^{1}/_{8}$" outer and inner steel plates creating a burglary resistant structure enclosing a unique proprietary fire resistant material.
- Three massive 1" diameter solid steel chrome-plated locking bolts.A full length dead bar locks deep into the body preventing door removal during a forced entry attempt.
- Heavy duty steel hinges provide easy smooth door operation.
- One recessed anchor bolt hole and mounting hardware are provided to securely anchor safe.
- Plush velour interior.
- Attractively accented with a brass, chrome or black nickel handle and decorative emblems.
- Available in several durable and attractive textured or high gloss finishes.
- Optional electronic locks are available. **SEE PAGES 38-42.**
- Optional storage cabinets available on models BF3416 and BF1716. **See page 12.**
- Optional BF Safe Pedestals available. Designed to carry weight and be secure, these heavy-duty risers place your "BF" security safe at a convenient height.

IRC916 IN-ROOM ELECTRONIC SAFE

AMSEC's IN-ROOM ELECTRONIC SAFE, with its easy installation, maintenance and management features has become a popular safe in the hospitality industry. Designed with the traveling guests in mind, the IRC916E will adequately secure laptop computers, cameras, jewelry and other valuables in the most user-friendly safe made.

FEATURES:

- Heavy duty steel construction offers excellent burglary protection.
- Convenient motorized locking system, incorporating the latest technology.
- Easy to read, large LED display lets you know the status of the safe.
- 4 to 6 digit combination, standard hotel room configuration (customer sets new combination every time safe is used, quickly and easily), or electronic credit card.
- Reliable ADA approved keypad.
- Runs on 4 AA batteries. If batteries should go dead, each safe has a by-pass power cable.
- Lock-out penalty if the combination is entered wrong, the safe will lock up for 15 minutes, frustrating the would-be burglar.
- Emergency key-lock override system with 2 keys.
- Spacious interior fits most lap top computers.
- Two anchor holes with mounting hardware included.
- Attractive carpeted bottom hides anchor bolts.
- Electrostatic powder-coated finish in textured black.
- Guest instruction label included.
- Packaged for UPS shipment.

OPTIONS:

- Hand-held, programming device, offering audit trail and electronic override (IRCPROG).

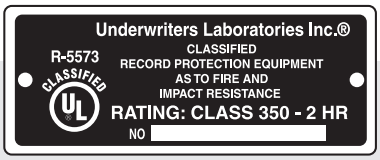
U.L SAFES LIFETIME REPLACEMENT WARRANTY:

All AMSEC U.L. Listed fire safes are protected by a LIFETIME FREE REPLACEMENT GUARANTEE, assuring the original owner free replacement of safes that are damaged beyond repair by a fire with a current production model of comparable value. The damaged safe must be returned freight prepaid to the factory within 30 days of the loss, accompanied by a properly filed fire department report.



U.L. FIRE RESISTIVE RATING CLASSIFICATION

THE FOLLOWING IS AN EXPLANATION OF THE UNDERWRITER'S LABORATORIES' FIRE RESISTANT CONTAINER TESTING PROCEDURES ON THE CLASS 350°F, ONE HOUR AND TWO HOUR FIRE LABELS.

U.L. Label/Class 350°F-one hour and Class 350°F-two hour. The safe will maintain an interior temperature less than 350°F when exposed to fire for a period of one hour at 1700°F or for a period of two hours at 1850°F. Safe must successfully undergo all other requirements for the Fire Endurance Test, Explosion Hazard Test and the Fire/Impact Test as stated below.

FIRE ENDURANCE TEST

After heat sensors and paper are placed inside the safe, the unit is locked and exposed to a uniformly distributed fire. The furnace is regulated to reach a maximum temperature of 1700°F for a period of one hour, or 1850°F for two hours, then allowed to cool without opening the furnace. The interior temperature is recorded throughout the test and during the cooling period until a definite drop is shown and must never exceed 350°F.

Once cooled, the unit is opened and examined for usability. The units locking mechanisms and parts fastenings are examined for security and the interior examined for visible evidence of undue heat transmission.

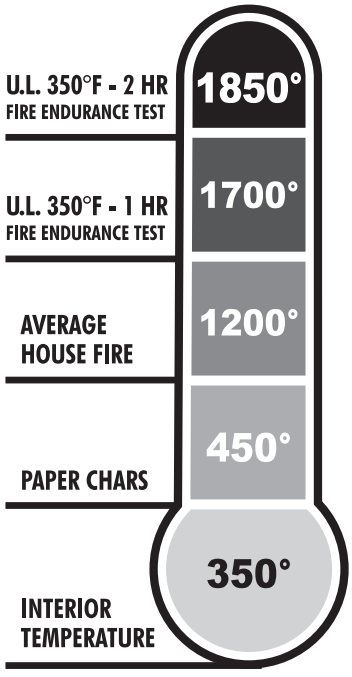
EXPLOSION HAZARD TEST

The safe is locked and placed into a furnace preheated to 2000°F. This temperature is maintained for 30 minutes (2 hour test is 45 minutes) and if no explosion results, the unit is allowed to cool without opening the furnace doors. Once cooled, the unit is opened and examined for usability. The units locking mechanisms and parts fastenings are examined for security and the interior examined for visible evidence of undue heat transmission.

FIRE IMPACT TEST (MANUFACTURER'S OPTION)

After the explosion hazard test the safe is removed from the furnace and within two minutes is dropped 30' onto a riprap of brick on a heavy concrete base. After impact the unit is examined for deformation, rupture of parts, damaged insulation and any other openings into the interior of the unit. Once cooled, the unit is inverted and reheated to 1550°F for a period of 30 min. (2 hour test: 45 min. at 1638°F).

Once cooled, the unit is opened and examined for usability. The units locking mechanisms and parts fastenings are examined for security and the interior examined for visible evidence of undue heat transmission.



FS SERIES IMPORTED U.L. LISTED 1-HR FIRE SAFES

The economical range of our **IMPORTED RESIDENTIAL FIRE SAFES** are the answer's to today's high incidence of residential fires. Our Fire Safes also provide burglary protection making them ideal for home and light commercial applications.

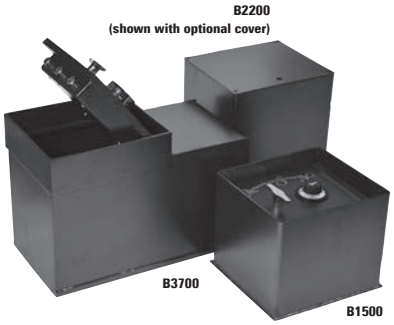
BRUTE AND SUPER BRUTE

All BRUTE SERIES safes are designed to provide secure storage for documents, jewelry, precious metals and miscellaneous valuables at an economical price. When properly installed in a concrete floor, **BRUTE SERIES** safes provide excellent fire and burglary protection. **BRUTE** floor safes meet and exceed the requirements of the Insurance Offices Manual of Burglary Insurance. You may also add many options to customize your safe such as: A drop slot in the door, depository chute, digital keypad lock and keylocking dial to name a few. **BRUTE SERIES** safes may be installed in the floor, wall, cladding or within a larger safe.



BRUTE SERIES

STANDARD FEATURES:

- Charcoal Gray textured body and door.
- Attractive design offers strong reliable welds to protect against burglary attacks and reduce possible leakage.
- U.L. listed Group II combination lock.
- An additional spring-loaded relocking device, activated by a punching attack.
- Lock and relocks are protected by a large carburized hardplate.
- Handle activated locking mechanism consisting of five ¾" locking bolts in Brute safes and three 1" diameter locking bolts in Super Brute safes. Each bolt is drive resistant, chromed steel with a long throw.
- One piece heavy duty dead bar behind hinge prevents removal of door even if hinges are removed during a forced entry attempt.
- Doors are interchangeable within product group.

BODY:

- Oversize floor plate ensures strong installation in concrete.
- Flush cover plate.
- Solid steel hinge mechanism using 3/8" diameter steel hinge pins and internal mounting bolts.

SUPER BRUTE SERIES

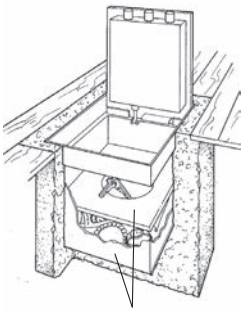
ADDITIONAL FEATURES:

- The **SUPER BRUTE's** new door jamb design is manufactured with state-of-the-art equipment, with built-in devices offering the ultimate protection against sledgehammer attack.
- ¾" solid steel plate door is standard.
- Doors are removable and interchangeable.
- A large, convenient 10¾" x 11⅛" door opening for bulky items.
- One sliding shelf with double wide model (B3700).
- Attractive carpeted floor in every unit.

BRUTE RECTANGULAR BODY, WIDE DOOR

ADDITIONAL FEATURES:

- A large, convenient 10¾" x 16" door opening, for large bulky items or cash tray storage.
- ½" solid steel plate door.



BRUTE SLOTTED DOOR

Slotted Doors

Slotted doors are also available on freestanding plate safes, freestanding clad, composite chests, interior lockers and interior drawers.

Slotted door not recommended for use on B1500.

Note: Safes with slotted doors are not recommended for overnight storage.

SUPER BRUTE FLOOR SAFES

STAR® ROUND LIFT-OUT DOOR

FLOOR SAFES are engineered with advanced security features. STAR Tube safes have been the standard for gas stations, fast food, small retail establishments and home owners for over 70 years.

"C" RATE LIFT-OUT DOOR FEATURES:

- Manipulation resistant, unitized key changeable lock protected by a revolving carburized hardplate.
- Removable dial and drive/drill resistant spindle preventing damage from burglary attack and additional protection from hold-up.
- Door, 7-1/4" clear opening, is 1-3/4" solid steel.
- Door is securely locked by three bolts each requiring over 25,000 pounds to shear.
- Each locking bolt has its own hardened steel positive relocking bolt.
- Body — Heavy "B" rate construction.

OTHER FEATURES:

- Water resistant, high impact molded dust cover with rubber "O"-ring seal does not rattle or slide like most covers.
- STAR's double compartment models provide the commercial user with the most effective cash handling system available. Hold-up as well as burglary protection is greatly enhanced by use of this type of safe.
- Available with dual key inner compartment. Manager holds one key, the armored car driver, or employee holds the second.

STAR® "C" RATE TUBULAR BODY SAFES

STAR "C" RATE SLOTTED ROUND DOOR with 3/8" x 3½" slot

Slotted Doors
Slotted doors are also available on freestanding plate safes, freestanding clad, composite chests, interior lockers and interior drawers.

Note: Safes with slotted doors are not recommended for overnight storage.

WALL SAFES

AMSEC WALL SAFES are designed to provide hidden protection for documents and miscellaneous valuables. Each wall safe is also designed for easy installation between 16" o/c wall studs. Pre-drilled anchor holes and a built-in flange eliminates unnecessary replastering.

WEST2114

WEST2114

FEATURES:

- Heavy duty steel body, 3/16" solid steel door and flange.
- Extra spacious interior, while still offering the convenience of fitting between studs.
- DL6000 bounce-proof electronic lock with a LCD display allows smooth and easy operation.
- LCD display shows low-battery indicator, time, date and keypad.
- Emergency key-lock override system with two (2) keys, power override battery box, built-in spy-proof function and motion detector alert.
- Heavy gauge solid steel construction, plus dual live bolts made also of heavy gauge steel.
- Carpeted base.
- Pry-resistant recessed door with internal hinges for anti-theft protection.
- Two removable shelves.
- Cream colored, durable powder coated finish.
- Packaged for UPS shipment.

WS1014

WS1014

FEATURES:

- U.L. listed Group II key changeable lock, with relock and 1 million possible combinations.
- Electronic lock optional.
- Flat dial allows flush mounted installation.
- 3/16" thick solid steel door with dead bar.

WS1214E5

HEAVY-DUTY WS1214E5

FEATURES:

- Same features as Super Brute Floor safes. Please see page 20.
- Two removable shelves. Extra deep interior.
- AMSEC's ESL5 electronic lock with illuminated keypad.

WFS149E5LP

When fire is a concern, there is no better wall safe than the WFS149 or WFS149E5LP.

WFS149

FEATURES:

- UL Listed one hour fire rating, ensuring the inside temperature never exceeded 350° F (paper chars at 450° F).
- Extra deep interior, with one (1) convenient drawer shelf.
- Combo lock with key operated side-locking mechanism incorporating one chromed locking bolt.
- Each safe is equipped with side locking boltwork mechanism incorporating 1/2" steel deadbolts.
- Impressive 1/2" thick door with attractive Black Granite finish.

WFS149E5LP WITH ESL5LP ELECTRONIC LOCK:

- Illuminated Keypad
- Factory Reset Combination for resolving lost combinations without requiring expensive service calls.
- Beep and flash from every keystroke gives maximum feedback to the user.
- Lock can be programmed to silence the beep in stealth mode.
- 15-Minute Penalty Lockout after four incorrect entries protects against manipulation attempts.
- One 9-volt battery can be easily replaced in the keypad housing.

UNDERCOUNTER SAFES

AMSEC'S UNDERCOUNTER SAFES limit excess cash register funds by providing instant protection for interim deposits of cash or checks via the anti-fish deposit slot. Securely positioning the safe next to the cash register limits exposed cash and reduces the threat of robbery and internal theft. Adaptable for multi-unit installation use, ideal for gun control, staff use, athletics clubs, security areas and much more.

(LOCK OPTION -1)

IMPORTANT:

AMSEC depository safes are recommended for an operation that requires a non-returnable deposit such as armored car companies, convenience stores, restaurants, etc. The top locker is not meant for overnight storage of cash or valuables.

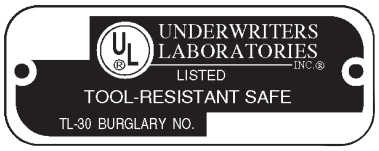
†ADD 2" FOR HANDLE, DIAL AND HINGE PROJECTION.

DXE / DXF AND CDXE / CDXF U.L. LISTED

AMSEC TL-15 and TL-30 U.L. Listed **MONEY CHESTS** qualify for Mercantile & Broadform Insurance Class ER (TL-15) and F (TL-30) with a banking rating of BR (TL-15) and G (TL-30). **AMSEC MONEY CHESTS** offer the highest level of security available with many outstanding features and a wide range of options.



CDXE2020
TL-30 Composite Body and Plate Door

DXE2020
TL-15 Plate Body and Door

FEATURES

DOOR:

- DXE and CDXE models are TL-15 rated constructed of ½" thick high-strength solid steel plate.
- DXF and CDXF models are TL-30 constructed of 1¾" thick laminated steel with a special hardened drill resistant plate.
- Oil impregnated bronze bearing hinges.

BODY:

- DXE models: Consist of ½" thick steel plate (100,000 P.S.I. minimum tensile strength). All external seams are beveled and continuously welded.
- DXF models: Models under 50" in height consist of ½" thick steel plate with100,000 P.S.I. minimum tensile strength. DXF models over 50" in height constructed of ¾" thick steel plate with 75,000 P.S.I. minimum tensile strength. All external seams are beveled and continuously welded.
- CDXE and CDXF models: consist of 3¼" thick body constructed of inner and outer steel plates enclosing a high density composite material.
- Shelf strips installed allowing shelf adjustment. Shelves optional.

LOCKING MECHANISM:

- U.L. listed Group 2M key changeable combination lock, with relock and 1 million possible combinations.
- Single auxiliary spring loaded relocking device, activated by a punching attack.
- Locks and relocks protected by a patented active hardplate.
- A handle activated locking mechanism consisting of two to six 1" chromed steel locking bolts.
- Five boltwork sizes allow AMSEC to build units from 12" (10½" for DXE/DXF) to 88" high, widths from 14" to 41".
- Solid steel dead bar prevents door removal if hinges are removed during a forced entry attempt.
- Compact locking mechanism and boltwork cover allow for optional door mounted coin racks.

HINGES:

- Fabricated from high strength steel with precision machined alloy dowel pins.
- Oil impregnated bronze bearing assures easy opening doors and reduced maintenance.
- Vertical height adjustment.

FINISH:

- Available in Textured Black, Parchment, Standard Gray, Blue Gray, Romanesque Gray, Charcoal Gray, Granite, Sandstone or Chocolate Brown textured finish.

OPTIONS:

- Spyproof dial
- Key lock dial
- Coin racks
- Managers lockers
- Interior lockers
- Interior drawers
- Adjustable shelves
- Group 1 and 1R locks
- Electronic locks
- Access Control Systems
- Auxiliary Key-Op locks
- Dual combination locks (some models)
- 144 hour timelock
- 15 minute time delay lock
- External day lock
- Claddings
- Anchor bolt assembly
- Left swing door
- Internal rotary hopper
- Internal deposit slot
- Internal deposit chutes
- Hidden compartments
- Modular alarm
- Hold up duress alarm
- Special sizes
- Custom colors

AMVAULTX6 TL-30X6 HIGH SECURITY SAFE

CFX582820

SECURITY BP10495 UL LISTED TOOL-RESISTANT SAFE TL-30X6 BURGLARY NO.

The Amvaultx6 U.L. Listed TL-30x6, six-sided high security composite safes are made in the United States using the latest testing procedures set forth by Underwriters Laboratories.

The new revolutionary Amvaultx6 is constructed with a 3" defense barrier of inner and outer steel plates enclosing a unique interlocking heavy duty steel barrier, high strength concrete exceeding 12,000 PSI and a high-density high-strength ceramic matrix.

The high density insulating materials incorporated in the door and body also insure two hours of certified fire protection. The superior design and craftmanship make the new Amvaultx6 impervious to burglary attacks attempted by the most sophisticated equipment utilized today and the vaults contents against intense fires.

ACF TL-30 2-HOUR FIRE RATED DEPOSITORY SAFE

ACF4824DS SHOWN WITH OPTIONAL ESL20XL ELECTRONIC LOCKS AND AUXILIARY KEY-OP LOCK

AMSEC's ACF TL-30 TWO DOOR DEPOSITORY SAFE offers complete cash management versatility for any operation that requires a nonreturnable deposit such as armored car companies, convenience stores, restaurants, etc. The U.L. listed TL-30 composite construction offers peace of mind when overnight protection is required.

In addition to the outstanding features listed under ACF TL-30 Money Chest, the ACF4824DS Depository safe also offers:

TOP DEPOSIT / STORAGE COMPARTMENT

- Outer door equipped with a U.L. listed Group 2M combination lock and chrome plated front read dial.
- Large storage capacity: accommodates up to nine cash register trays.
- Large 3" x 18" deposit chute is protected by an "anti-fish", saw-tooth, hinged baffle.
- Two adjustable shelves.
- Door mounted four-opening rolled coin storage rack.

BOTTOM RECEIVING COMPARTMENT

- Outer door equipped with a U.L. listed Group 2M combination lock, chrome plated front read dial and an auxiliary key-op lock for dual control or armored car pick up.

OPTIONS:

- Electronic locks, Group 1 and 1R locks.
- Dual combination locks (Receiving compartment only).
- Spyproof dial, Keylock dial.
- Modular alarm.
- Interior lockers, Interior drawers, Adjustable shelves.
- Custom sizes/designs quoted upon request.
- Access Control Systems.

FINISH

- Available in Black, Parchment, Standard Gray, Blue Gray, Romanesque Gray, Charcoal Gray, Granite, Sandstone or Chocolate Brown textured finish.

SEE PAGE 11 FOR DETAILS**

FEATURES:

DOOR:

- Overall thickness of 6" and is constructed with a 3" defense barrier of outer and inner steel plates creating a single structure enclosing a unique, high density fire and burglary resistant composite material.
- Defense barrier houses a proprietary amalgamation of nuggets and steel fibers to withstand concentrated attacks with the most sophisticated equipment used by burglars today.
- Heavy duty pull handle standard on all CE/CF Models

BODY:

- The AmVault formed body has a total protective thickness of 3½" enclosing a high density fire resistant composite material with nuggets and steel fibers.
- A reinforced drill resistant door frame protects the door and each individual bolt chamber from severe side attacks.
- A proprietary inner barrier protects against peeling attacks.
- High strength adjustable shelves with powder coated parchment finish.

FIRE ENDURANCE:

- Two hour, 350°F factory fire rating. Tested at temperatures up to 1850°F

LOCKING MECHANISM:

- Equipped with six or ten massive 1½" diameter chrome plated solid steel locking bolts. Each bolt moves deep into the body's protected bolt chambers.
- Entire boltwork mechanism is also protected by a spring operated boltwork detent system. Bolts stay in the retracted position when the door is opened and automatically engage when the door is closed.

THREE-WAY BOLTWORK OPTION:

- Safes can be equipped with a three way active boltwork mechanism engaging the bolts horizontally and vertically into the body of the safe.

LOCKS:

- Equipped with a U.L. listed Group 2M key changeable combination lock. The lock is protected by a massive drill shattering hard plate and two additional spring- loaded devices.

HINGES:

- Offers a vertical height adjustment and utilizes an oil impregnated bearing ensuring easy door operation.

OPTIONAL AUXILIARY KEY LOCK:

- U.L. listed, high security auxiliary key lock is also available on all AMVAULT safes (except Model 1814). Lock is equipped with 2 keys and escutcheon cover.
- An additional spring-loaded relock device protecting lock against punch attacks.

OPTIONAL GLASS RELOCKING MECHANISM

- Incorporated into the AMVAULT TL-30 auxiliary key lock is an optional high security tempered glass relock mechanism with a remotely and randomly placed "cross locking" relocking bolt and thermal cords to protect against torch attacks.
- In the event of an attack by tools, torches, or explosives, the glass will shatter activating the highly sophisticated relock mechanism.
- Utilizing the glass relock mechanism can offer up to a total of six different relock devices offering the ultimate in high security protection.

SAFE SPECIFICATIONS

AMVAULT High Security Composite safes have passed Underwriter's Laboratories most recent testing procedures ensuring you today's best protection. AMVAULT TL-15 and TL-30 U.L. listed composite safes qualify for Mercantile & Broadform Insurance Class ER (TL-15) and F (TL-30) with a Bank Rating of BR (TL-15) and G (TL-30). Two Hour Class 350°F manufacturers' fire label. Standard finish is Parchment. Other colors available on request.

UNDERWRITERS LABORATORIES' BURGLARY RATING CLASSIFICATION

U.L. LABEL — BURGLARY CLASSIFICATION TL-15:

Signifies a combination-locked safe designed to offer a limited degree of protection against attack by common mechanical and electrical hand tools and any combination of these means.

CONSTRUCTION REQUIREMENTS

- U.L. listed Group 2M, 1 or 1R combination lock or Type 1 Electronic lock.
- 750 lbs. minimum or comes with instructions for anchoring in a larger safe, concrete blocks or on the premises where used.
- Body walls of material equivalent to at least 1" open hearth steel with a minimum tensile strength of 50,000 P.S.I.
- Walls fastened in a manner equivalent to continuous ¼" penetration weld of open hearth steel with minimum tensile strength of 50,000 P.S.I.
- One hole ¼" or less, to accommodate electrical conductors arranged to have no direct view of the door or locking mechanism.

PERFORMANCE REQUIREMENTS

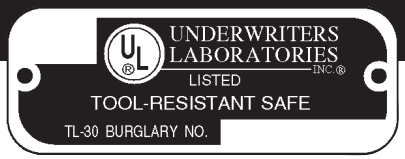
Successfully resist entry* for a net working time of 15 minutes when attacked with common hand tools, picking tools, mechanical or portable electric tools, grinding points, carbide drills and pressure applying devices or mechanisms.

U.L. LABEL —BURGLARY CLASSIFICATION TL-30:

Signifies a combination-locked safe designed to offer a moderate degree of protection against attack by common mechanical and electrical hand tools and any combination of these means.

CONSTRUCTION REQUIREMENTS

Same as TL-15



PERFORMANCE REQUIREMENTS

Successfully resist entry* for a net working time of 30 minutes when attacked with common hand tools, picking tools, mechanical or portable electric tools, grinding points, carbide drills and pressure applying devices or mechanisms, abrasive cutting wheels and power saws.

*Entry=Safes classed as TL-15 — opening the door or making a six square inch opening entirely through the door or front face. Safes classed as TL-30 — opening the door or making a six square inch opening entirely through the door or front face.

MAX15 SERIES COMPOSITE SAFES

Our **MAX15 SERIES COMPOSITE SAFES** have been awarded the U.L. TL-15 label after withstanding concentrated attacks by experienced U.L. experts using powerful tools, such as sledgehammers, power saws, carbide disc cutters and drills.

In addition to providing excellent burglary protection, MAX15 SERIES SAFES offers a 90-Minute ETL Intertek verified fire rating, ensuring your valuables are safe from intense fires.

DOOR

- Overall thickness of 6¾" (4¾" on MAX1014). Constructed with a 2½" (2" on MAX1014) defense barrier of outer and inner steel plates enclosing a unique, high-density fire and burglary resistant composite material
- Defense barrier houses a proprietary amalgam of nuggets and steel barriers to withstand concentrated attacks from the most sophisticated equipment used by burglars today
- Heavy-duty pull handle standard on all models

BODY

- Total protective thickness of 2¾" (2 $^{13}/_{16}$" on MAX1014) enclosing a high-density fire resistant composite material with nuggets and steel barriers
- A reinforced drill resistant door frame protects the door and each individual bolt chamber from severe side attacks
- A proprietary inner steel barrier protects against peeling attacks
- High-strength adjustable shelves with charcoal gray finish
- Equipped with a recessed 9/16" diameter anchor hole

FIRE ENDURANCE

- 90-minute Intertek verified fire rating (When analyzing the fire performance, weigh reports from ETL or UL laboratories against unverified factory testing claims)

LOCKING MECHANISM

- Four-way active boltwork mechanism engages the bolts horizontally and vertically into the body of the safe
- Equipped with 8 to 16 massive 1½" diameter (six 1⅛" diameter on MAX1014) polished stainless steel locking bolts. Each bolt moves deep into the body's protected bolt chambers

LOCKS

- Equipped with the AMSEC ESL10XL U.L. Listed Type 1 electronic lock. The lock is protected by an internal relock mechanism and a massive drill-shattering hardplate
- The lock and vital mechanism areas are also protected by a high-security tempered glass plate with a remotely placed spring-loaded relocking bolt
- In the event of an attack by tools or explosives, the glass will shatter, activating the highly sophisticated relock mechanism

HINGES

- Heavy-duty steel hinges provide smooth door operation

COLOR

- Charcoal gray textured finish

ACF TL-30 U.L. LISTED FIRE RATED MONEY CHEST

ACF4024
SHOWN WITH
AUXILIARY LOCK

AMSEC TL-30 U.L. Listed **MONEY CHESTS** qualify for Mercantile & Broadform Insurance Class F (TL-30) with a banking rating of G (TL-30). AMSEC MONEY CHESTS offer the highest level of security available with many outstanding features and a wide range of options.

FEATURES:

DOOR:

- 5½" thick door constructed of outer and inner steel plates enclosing a high density proprietary composite material.
- Two hour, 350°F factory fire rating. Tested at temperatures up to 1850°F.

BODY:

- 3¼" thick body constructed of inner and outer steel plates enclosing a high density proprietary composite material.
- Door and inner jamb surrounded by thick solid steel bars.
- Adjustable shelves.

LOCKING MECHANISM:

- U.L. listed Group 2M key changeable lock, with relock and 1 million possible combinations.
- Single auxiliary spring-loaded relocking device, activated by a punching attack.
- Locks and relocks protected by a large proprietary drill shattering active hardplate.
- A handle activated locking mechanism consisting of three to five 1" diameter chromed steel locking bolts.
- Five boltwork sizes allow AMSEC to build units from 12" to 82" high, widths from 18" to 48" (interior dimensions).
- Solid steel dead bars prevent door removal if hinges are removed during a forced entry attempt.
- Compact locking mechanism allows for optional door mounted coin racks.

HINGES:

- Ball bearing hinges fabricated from high strength steel.
- Precision machined alloy dowel pins.
- Oil impregnated bronze bearing assures easy opening doors and reduced maintenance.
- Vertical height adjustment.

FINISH:

- Available in Satin Black, Parchment, Standard Gray, Blue Gray, Romanesque Gray, Charcoal Gray, Granite, Sandstone or Chocolate Brown textured finish.

BLB AND BLC SERIES

AMSEC "B" AND "C" RATE SECURITY CHESTS are designed to provide secure storage at an economical price. In addition to meeting the requirements of the Insurance Offices Manual of Burglary Insurance, these units offer an appearance and many features similar to AMSEC'S higher rated TL-15 models.

BLC3024

STANDARD FEATURES

DOOR:

- 1" ("C" Rate), or ½" ("B" Rate) steel pry-resistant recessed door.
- U.L. listed Group II key changeable lock, with relock and 1 million possible combinations.
- Additional spring loaded relocking device, activated by a punching attack.
- Locks and relocks protected by a large carburized hardplate.
- A handle activated locking mechanism consisting of three 1" chromed steel locking bolts. (five in BLB and BLC4024 models).
- Solid steel full length dead bar prevents door removal if hinges are removed during a forced entry attempt.
- Adjustable ball bearing hinges.

BODY:

- ½" ("C" rate) or 1/4" ("B" Rate) solid steel bodies.
- Body reinforcing frame gives the appearance of 1" thick walls to discourage attack.
- Adjustable shelves.
- Attractive Gray textured finish. Other colors available.
- Custom sizes, interior options and high security features available.
- Left swing door optional.

BWB SERIES AND MS1414

The many different features of the **WIDE BODY SAFES**, make them perfect for commercial application or home use.

BWB3020

BWB2020

MS1414 WITH DUAL NOSE KEY LOCK

MS1414CS WITH SLOT OPTION

STANDARD FEATURES FOR BWB:

- ½" thick solid steel door, recessed for resistance to pry attacks.
- Formed, high-tensile steel body and jamb construction to maximize protection against pry attacks.
- U.L. listed Group II key changeable combination lock with over 1 million possible combinations.
- Optional electronic locks available.
- Auxiliary spring-loaded relock device.
- Locks and relocks protected by a large carburized hardplate.
- Attractive Charcoal Gray textured finish.
- BWB: Four anchor bolt holes.

ADDITIONAL BWB SERIES FEATURES:

- Reinforced internal jambs on all four sides to provide excellent protection against sledgehammer attack.
- 3-way locking mechanism consisting of five massive 1" diameter chromed steel locking bolts.
- Bolt detent system keeps bolts retracted when the door is open, then automatically engages when door is shut.
- Convenient door mounted recessed coin rack.
- Large capacity for storage of cash trays.
- Adjustable shelves.

MINI SAFE (MS SERIES) FEATURES:

- Formed, high-tensile steel body and jamb construction to maximize protection against pry attacks.
- ½" solid steel door.
- U.L. Group II combo lock (C), U.L. listed dual nose keylock (K).
- Three 1" diameter chromed steel locking bolts.
- Bolt detent system engages boltwork automatically.
- Auxiliary spring-loaded relocking device.
- Lock and relock protected by large carburized hardplate.
- Four anchor bolt holes.
- Adjustable shelf provided.
- Also available with optional deposit slot (s). (shown above) Slot size: ½" H x 6 W"

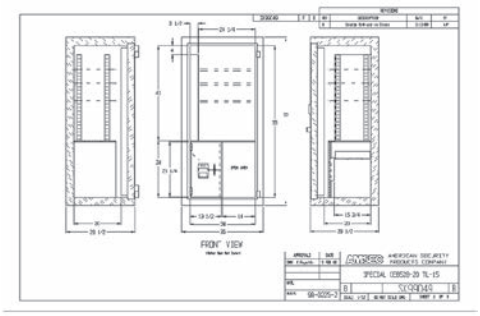
CUSTOM SAFES

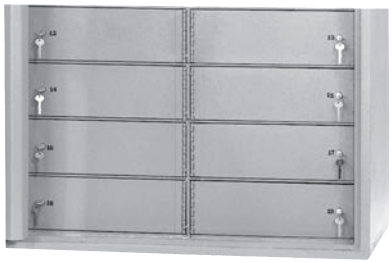


AMSEC specializes in manufacturing CUSTOM SAFES for supermarkets, banks, restaurants, convenience stores, gas stations, hotels, mini-marts and other businesses. With over 70 years experience building custom safes, AMSEC has the knowledge and expertise to design a safe to meet your cash handling requirements. Our engineering department is equipped with the latest in computer-aided design (CAD) systems for rapid creation of detailed sales sketches, concept drawings, final product prints and design modifications to help you visualize how the safe will look and function. Custom safes are available in every insurance classification from "B" Rate to U.L. listed TL-30 models.

OPTIONAL EXTRAS

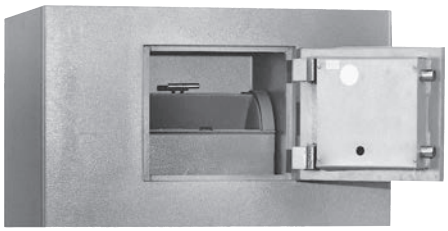
INTERIOR DRAWERS

All drawers are commercial quality, heavy steel construction. Available in letter, legal and document sizes. Each is furnished with handle and key lock. All drawer capacities are 100 lbs. and come with a heavy duty latch removable ball bearing suspension.



Interior Lockers

AMSEC offers a wide variety of standard interior locker compartments to fit your needs. Standard lockers are constructed of 11 gauge or ¼" solid steel. Options include slotted doors, combination locks and high security key locks.



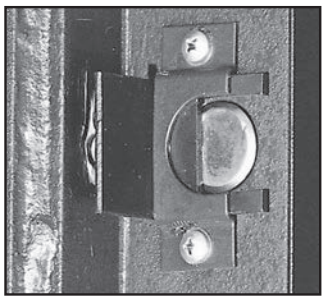
Interior/Exterior Hopper

Available in three different package sizes ranging from 5¾" D x 3½" W x 8¾" L to 7" D x 4½" W x 10¾" L.

Hoppers can be installed on the interior or exterior of plate, clad or composite safes.

MODULAR ALARM SYSTEM

Detects vibration, heat and door openings. Heat indicator activates alarm when torch attack occurs. Internal magnetic door contact detects door opening. Internal vibration sensor activates alarm if safe is moved or during drill attack.



Locking Bolt Detent

Keeps locking bolts retracted when door is in open position. Prevents damage to safe body and boltwork mechanism caused by accidental door closure with bolts extended.

Coin Racks

For organized storage of coins. Mounted on inside safe door. Available with four or six compartments.

AMSEC SAFEWIZARD II®

SafeWizard II is the most flexible and powerful safe access control system available.

SECURITY

- All components communicate through an encrypted network
- Large high-contrast LCD display
- Supports dual control and armored car pickups
- Supports time delay as a deterrent to robberies
- Supports time lock restricted access to defined operating hours
- 120,000-record audit trailSupports up to 500 users, each of whom can have unique privileges
- PIN code and/or AMSEC e-Key for user authentication
- Door and bolt sensors detect if a door has been left open
- Battery backup for 8 hours of power-out operation
- Backup database secured inside of safe

FLEXIBILITY

- Network access via Ethernet or Wi-Fi connection
- Local firmware upgrades via USB
- Supports up to 12 locks and one deposit lock
- Multiple lock designs to support access control of safe doors, lockers and drawers
- Each lock can be individually configured for all access control parameters and user access
- Alarm interface
- Four language options: English, French, German, Spanish

ESLAUDIT II

ESLAudit II U.L. Listed Type 1 Electronic Lock makes it easy to manage safe access with it's integrated USB Port.

SECURITY

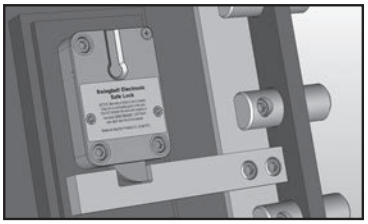
- U.L. Listed Type 1
- All components communicate through an encrypted network
- Supports dual control and armored car pickups
- Supports time delay as a deterrent to robberies
- Supports time lock restricted access to defined operating hours
- Supports alarm output or duress alarm
- 5,000-record audit trail
- Supports up to 40 users, each of whom can have unique privileges
- PIN code and/or electronic keys for user authentication
- Optional door sensor detects if door is left open
- Back-up database secured inside of safe

FLEXIBILITY

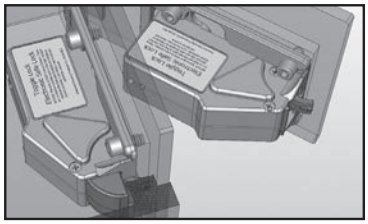
- Retrofits most mechanical or electronic locks
- Supports Swingbolt and Toggle locks
- Controls up to 4 doors
- Safe doors can be configured in an inner/outer door configuration
- Authentication options: PIN and/or AMSEC e-Key
- 9-volt battery and optional AC power
- Optional remote time delay indicator
- Update firmware via USB port

POWERFUL PC APPLICATION

- Manage users
- View and store audit trails
- Manage system configuration
- Manage door settings



SWING BOLT LOCK



TOGGLE LOCK

ESL5 AND ESL15

AMSEC is a pioneer in the electronic lock market, and the **ESL5 AND ESL15 ELECTRONIC LOCKS** offer unrivaled value in electronic safe access. The ESL5 and ESL15 locks have the best blend of features and function in electronic safe locks. The ESL5 offers attractive chrome or black rubberized finish ABS housing with a backlit alphanumeric keypad. The ESL15 offers durable black rubberized finish ABS housing with an alphanumeric keypad. The ESL5 is a basic keypad lock for home and office applications. The ESL15 offers advanced features necessary for commercial applications.

ESL5 & ESL15 FEATURES:

- Replaces most mechanical combination locks. Easy installation and operation.
- U.L. Listed ESL5 has an attractive chrome or black rubberized finish ABS housing with a backlit alphanumeric keypad.
- ESL15 (U.L. Listing Pending) has a durable black rubberized finish ABS housing with an alphanumeric keypad.
- Factory Reset Combination for resolving lost combinations without requiring expensive service calls.
- Electronics are encapsulated within the lock and are sealed to prevent possible moisture-related failures.
- Cable fits through a ½" spindle hole without cutting and re-crimping connector.
- Beep and flash from every keystroke gives maximum feedback to the user.
- Lock can be programmed to silence the beep in stealth mode.
- 15-Minute Penalty Lockout after four incorrect entries protects against manipulation attempts.
- New swing bolt reversible lock design for right- or left-handed installation.
- Lock "auto-locks" when boltwork is thrown to prevent safes from being left in a day-lock position.
- One 9-volt battery can be easily replaced in the keypad housing.

ESL15 ADDITIONAL FEATURES:

- Time Delay Mode allows delay to be set from 1 to 99 minutes.
- Armored Car Override allows an armored car service to bypass Time Delay.
- Multiple User Mode allows for one master code and eight user codes to be used for full supervisory control and code management.
- Dual Control Mode programs the lock to require two combinations to open.

AMSEC ESLXL SERIES

AMSEC has been a pioneer in the electronic lock market. The **ESLXL SERIES** locks offer unrivaled value in electronic safe access. The ESL10XL and ESL20XL locks have the best blend of features and function in Electronic Safe Locks. The ESLXL SERIES offer an attractive metal die-cast keypad housing with an alpha-numeric slanted keypad. The ESL10XL is a basic keypad lock for home and office applications. The ESL20XL offers advanced features necessary for commercial applications.

ESL10XL WITH CHROME FINISH

ESL20XL WITH BLACK FINISH

ESL10XL FEATURES:

- Replaces most mechanical combination locks. Easy installation and operation.
- Factory Reset Combination for solving lost combinations without requiring expensive service calls.
- Electronics are encapsulated within the lock and are sealed to prevent possible moisture related failures.
- Cable fits through a ½" spindle hole without cutting and re-crimping connector.
- Audible beep and flash from every keystroke gives maximum feedback to the user.
- 15 minute Penalty Lockout after four incorrect entries protects against manipulation attempts.
- New patented dead-latched lock design with an internal relock device for maximum security.
- Lock "auto-locks" when boltwork is thrown to prevent safes from being left in a day lock position.
- Slam Bolt version for locker applications.

ESL20XL ADDITIONAL FEATURES:

- Time Delay Mode: Delays can be set from 1 to 99 minutes.
- Multiple User Mode: When enabled, one Master code and eight user codes are available with full supervisory control and code management.
- Dual Control Mode: The lock can be programmed to require two combinations to open for added security.
- Armored Car Override: When enabled, allows an armored car service to bypass Time Delay.

MECHANICAL LOCKS AND KEY LOCKS

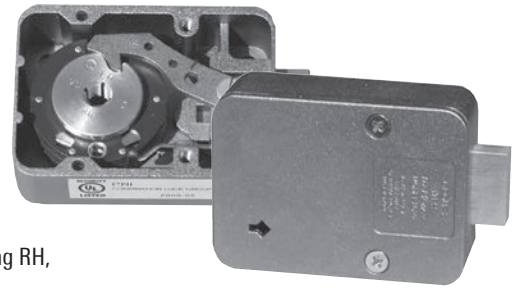
AMSEC offers a wide variety of options not listed here. Consult your AMSEC price book or call for other available options. AMSEC's staff will also assist in helping you choose the correct options for your security needs.

U.L. Listed Group 2 Mechanical Combination Safe Lock Kit

Mechanical Combination Safe Locks have been around for over 100 years and are very secure and reliable. With the proper care and service, the AMSEC mechanical combination safe lock will last a long time.

Features:

- Three brass and aluminum combination wheels provide 1,000,000 theoretical combinations.
- Dual brass locking cams prevent wheel slippage.
- Solid brass locking bolt and zinc drop lever.
- Four-way brass drive cam allows mounting RH, LH, VU or VD.
- Internal spring-loaded brass relock trigger guards against punch attacks.
- Standard mounting footprint matches most mechanical and electronic safe locks.
- Large front-read convertible dial and ring.
- Both dial and ring are die cast with black finish and white letters.
- A solid, machined brass spindle – 4 7/8"
- Can be converted to a key-locking dial with a disc tumbler key cylinder and two keys (shown at below).
- Comes standard with an attractive self-stick solid dial insert or a key-locking dial insert.



Safe Lock Kit Includes:

- U.L. Listed Group 2 mechanical safe lock.
- Large front-read convertible dial & ring, B/W finish.
- Non-key-locking dial insert.
- Key-locking dial insert.
- Key cylinder and two keys.
- Package mounting hardware and two spline keys.
- Combination change key.
- Durable packaging and foam inserts protect contents from shipping damage.

Spyproof Dial

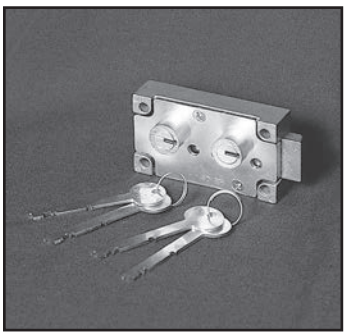
Restricts unauthorized viewing while dialing combination. Also available with key locking feature.

Key Locking Front Read Dial

Key is used to lock dial in a fixed position and affords dual custody control. Manager has the combination, collector has the key. Both must be present to unlock the safe.

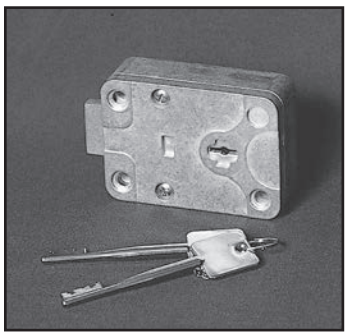
144 HOUR TIME LOCK

Safes equipped with Time Locks offer the capability of locking the safe for a pre-selected period of time. Time periods range from one hour to 144 hours (6 full days).



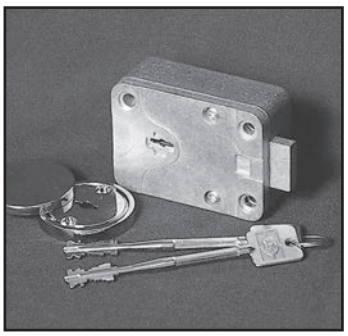
U.L. LISTED DUAL NOSE KEY LOCK

Dual control safe deposit lock requires two different keys to open safe.



U.L. LISTED KEY OP LOCK

European style seven-lever changeable key lock offers exceptional security features for use on inner locker or outer safe doors.



U.L. HIGH SECURITY KEY LOCK

European style nine-lever changeable key lock offers exceptional security features for use on inner locker or outer safe doors.
